

UV LIGHT IN USE WARNING SIGN UVT-UVWS

DESCRIPTION

UVTronix offers a warning sign for areas in which UV light is being used. High-intensity LEDs and a choice of color masks allows for a highly-visible indication tailored to match existing fixtures and signs. Stainless steel housing allows for further integration into existing facilities. Protect workers and personnel by providing a clear indication that UV light is in use in a designated area.

FEATURES

- High intensity LED backlight
- Available in 12 VDC or 120-277 VAC 50/60Hz
- Choice of polished stainless steel housing or painted CRS (please specify color)
- Can be custom made to show any other indication, simply supply your graphics
- Size: 11" x 7.75" x 2.25"
- Weight (stainless steel): 2.5lb

Due to a program of continuous improvement, the product specifications may change at any time.
